

Login Troubleshooting Guide

Introduction

This guide provides solutions to common login issues that users may encounter while accessing their account. Follow the troubleshooting steps below before contacting customer support.

Common Login Issues

Users may experience one or more of the following problems:

- Incorrect username or password
- Forgotten password
- Account locked
- Invalid One-Time Password (OTP)
- Multi-Factor Authentication (MFA) failure
- Browser compatibility issues
- Expired login session
- Network connectivity problems

Issue 1: Incorrect Username or Password

Possible Causes

- Incorrect username entered
- Incorrect password entered
- Caps Lock enabled
- Keyboard language changed

Resolution

1. Verify your username or email address.
2. Check whether Caps Lock is enabled.
3. Ensure your keyboard layout is correct.
4. Carefully re-enter your password.
5. If you still cannot log in, use the ****Forgot Password**** option.

Issue 2: Forgot Password

If you cannot remember your password:

1. Click ****Forgot Password**** on the login page.
2. Enter your registered email address.
3. Follow the instructions in the password reset email.
4. Create a new password.
5. Sign in using your new credentials.

Issue 3: Account Locked

For security reasons, accounts are temporarily locked after multiple unsuccessful login attempts.

Resolution

- Wait 30 minutes before trying again.
- Reset your password if necessary.
- Contact customer support if your account remains locked.

Issue 4: OTP Not Received

Possible Causes

- Network delays
- Incorrect phone number
- Email delivery delay

Resolution

- Wait up to 5 minutes.

- Check your Spam or Junk folder.
- Verify your registered phone number.
- Request a new OTP.
- Restart your mobile device if needed.

Issue 5: Invalid OTP

An OTP may become invalid if:

- It has expired.
- A newer OTP has already been generated.
- It was entered incorrectly.

Resolution

- Request a new OTP.
- Enter the latest OTP received.
- Complete verification within the validity period.

Issue 6: Multi-Factor Authentication (MFA) Problems

If MFA verification fails:

- Verify the system time on your authentication device.
- Use backup recovery codes if available.
- Resynchronize your authenticator application.
- Contact customer support if you cannot access your authentication device.

Issue 7: Browser Issues

Some login problems are caused by browser settings.

Try the following:

- Clear browser cache and cookies.
- Enable JavaScript.
- Disable browser extensions temporarily.
- Try another supported browser.
- Update your browser to the latest version.

Supported browsers include:

- Google Chrome
- Mozilla Firefox
- Microsoft Edge
- Safari

Issue 8: Session Expired

For security purposes, inactive sessions expire automatically.

Resolution

- Refresh the login page.
- Sign in again.
- Avoid leaving the login page inactive for extended periods.

Issue 9: Network Problems

If the login page does not load:

- Verify your internet connection.
- Restart your router.
- Disable VPN temporarily.
- Try using another network.
- Ensure your organization's firewall is not blocking access.

Login Security Tips

To protect your account:

- Use a strong and unique password.
- Enable Multi-Factor Authentication.
- Never share your password or OTP.
- Log out from shared or public computers.
- Regularly review your account activity.

Frequently Asked Questions

Why is my account locked?

Your account is automatically locked after five consecutive failed login attempts to protect against unauthorized access.

How long is the OTP valid?

Each OTP is valid for 5 minutes.

Can I log in without MFA?

If MFA is enabled on your account, verification is required. If you cannot access your MFA device, contact customer support.

Why am I repeatedly returned to the login page?

This may be caused by expired browser cookies, disabled JavaScript, or browser cache issues. Clearing your browser cache often resolves the problem.

Which browsers are officially supported?

The application supports the latest versions of:

- Google Chrome
- Mozilla Firefox
- Microsoft Edge
- Safari

When to Contact Customer Support

Contact support if:

- You cannot reset your password.
- Your account remains locked after the waiting period.
- OTP messages are never received.
- MFA recovery is unsuccessful.
- You suspect unauthorized access to your account.
- You encounter repeated login failures after completing all troubleshooting steps.
